

Stage Stores Inc.
856 Advanced Ship Notice Implementation Guide
4010 VICS

Stage Stores Inc, which includes the Peebles chain, strongly supports the Advanced Shipped Notice (ASN) to facilitate the supply chain. This document allows merchandise to flow more quickly and smoothly through our Distribution Center, allowing merchandise to arrive more quickly on the sales floor. This benefits both Stage Stores and our Vendor community.

Stage Stores requires the EDI 856 Advanced Shipped Notice (ASN) to accompany every shipment. Merchandise must be pre-ticketed. The cartons must be labeled with a UCC-128 shipping label. The requirements for ticketing and the UCC-128 label can be found at <http://www.stagestores.com/vendorguidelines/message.htm>.

Please insure that you are transmitting the correct Ship To (N1*ST) location in the ASN and physically shipping the merchandise to the correct DC. The Ship To location is sent in the header of every purchase order.

Violations will be assessed for shipments sent to the wrong location.

Listed below are several ASN format and carton content issues that affect our ability to fully utilize the vendor's ASN. These issues may result in delayed processing, require retransmission or initiate the creation of violations.

- The EDI file must contain a Bill of Lading number (BOL). This is sent in the REF Segment - REF*BM*BOL NUMBER.
- Carton detail is required. The ASN must contain carton ID's and the UPC and Quantity information for merchandise within that carton.
- The UPC cannot be listed multiple times within the same carton detail. The UPC must be listed only one time with the total number of units in the carton.
- Carton numbers must be unique. They should not be duplicated on the same ASN or within recent shipments.
 - Numbers must be unique, even if shipping orders to different Distribution Centers. The carton numbers are stored in a common database and will cause the ASN to reject.
- The N1 BY segment must have a value of '05099' or '00601' when the order is a Bulk shipment. A bulk shipment is defined here as an order that is not packed by store. Pre-mark or pack by store orders will have the actual store number from the Purchase Order's SDQ segment displayed in the N1 BY segment, example 05001, 05006, 00100, 00001, etc).
- If you discover an error was sent in an ASN and need to resend an ASN, contact the Stage Store EDI Department before retransmitting the file. The EDI staff will remove the original file from our Merchandising system. This will insure that the corrected file is loaded as quickly as possible.
- If multiple copies of an ASN are sent out in error, please contact the Stage Stores EDI Department as quickly as possible so duplicates can be removed.

856 - SHIP NOTICE / MANIFEST

Stage Stores, Inc. (SRI)

- An incorrect PO number will cause an ASN to reject during the edit process.

Your support in avoiding these issues will facilitate the processing of your shipments through our system and to the sales floor.
